

PROJECT OBJECTIVE

The main objective of the retail store stock inventory analysis is to the process of ensuring you carry merchandise that shoppers want, with neither too little nor too much on hand. By managing inventory, retailers meet customer demand without running out of stock or carrying excess supply.

By collecting the dataset and Visualization them into Charts as per the requirements of the project.

By the end of this project, you will:

- Know fundamental concepts and can work on IBM Cognos Analytics
- Gain a broad understanding of plotting different graphs.
